

TRANS DOE TASK FORCE and LAMMP finds and researches cases of LGBTQ+ missing and murdered persons, especially focusing on unidentified individuals who may have been transgender. TDTF advises and educates the public, media, and forensic professionals about the needs of and differences between Trans Doe cases and other Doe cases. The TDTF can also assist law enforcement departments, medical examiners, and forensic anthropologists with getting their cases worked on by forensic genetic genealogists.

LAMMP (LGBTQ+ Accountability for Missing and Murdered Persons) is our database of missing, murdered, and unclaimed LGBTQ+ people which was created to serve the community and attempt to match any unidentified people with missing people whose cases require LGBTQ+ informed care and consideration. LAMMP is private to protect the details of missing people who may be endangered.
